now spend the next however many it takes replies making out github "files" for this repo (put each "file" i it's own seperate copy box, titled with the filename and type it is (csv/yaml/md/whatevers best for each u decide case by case) for THE ART NOUVEAU STYLE. and if you CAN shove them in this repo, DO. if you can't that's fine i'll take your full transcript and have an agent make them real files

Art Nouveau and Alphonse Mucha Style Grammar

This repository contains a structured design grammar for identifying and tagging works

Contents

- [`art-nouveau-taxonomy.csv`](art-nouveau-taxonomy.csv): A controlled vocabulary of tags
- [`mucha-style-schema.yaml`](mucha-style-schema.yaml): A YAML schema defining how these

Usage

These files are intended to support:

1. **Database tagging** – Apply tags from the taxonomy to catalog Art Nouveau works.
2. **Style synthesis** – Use the schema to guide generative AI prompts for Mucha-inspire
3. **Academic research** – Reference the controlled vocabulary for consistent annotation
4. **Digital humanities** – Enable cross-collection comparison of Art Nouveau artifacts.

Tagging Guidelines

Each work can be tagged with multiple values across the nine dimensions. For example, Mu

Research Report

See [`research-report.md`](research-report.md) for a comprehensive breakdown of:
- Global style logic of Art Nouveau
- Composition and layout principles
- Linework and contour logic
- Human figures and poses (the "Mucha woman")
- Iconography and subject matter (seasons, flowers, arts, times of day, precious stones,
- Flora, fauna, and natural motifs
- Frames, borders, and architectural echoes (halos, Gothic windows, Byzantine influences
- Color, value, and surface treatment
- Typography and lettering
- Backgrounds, textures, and space
- Materials and media cues (lithography, influences)

Contributing

To add new tags or refine existing ones:
1. Consult the research report for evidential basis.
2. Follow the naming conventions in the taxonomy (snake_case, descriptive).
3. Update both `art-nouveau-taxonomy.csv` and `mucha-style-schema.yaml`.
4. Provide a brief description and example for each new tag.
